

SECURITY AND ACCESS

Private Pitch Access Checklist

A repeatable process for sharing the Franchise Mobile demo without exposing production data, owner privileges, credentials, source code, or proprietary systems.

Franchise Mobile keeps the league connected. NBA 2K remains where basketball is played.

Prepared for a private product and technical evaluation with Take-Two Interactive, 2K, and Visual Concepts.

Non-confidential presentation layer. No source code, credentials, private formulas, raw datasets, or repository access included.

Recipient approval

Confirm before granting access

- Recipient's full name, employer, title, business email, LinkedIn profile, and reason for access.
- Who referred the recipient and who internally expects the demo.
- Exactly which materials are approved: teaser, deck, guided demo, visual reel, or viewer account.
- Access start date, expiration date, and the person responsible for revocation.
- Whether legal review or an NDA is appropriate for the next stage.

Account rules

- Founder account is for owner-led screen sharing only.
- Each external recipient receives a unique viewer account whenever practical.
- Viewer accounts remain read-only and cannot claim teams, edit league state, or use destructive/admin controls.
- Send the demo link and temporary password through separate channels.
- Never paste local credential files into email, LinkedIn, decks, shared drives, or meeting chat.

Production project: never shared. Demo project: isolated, seeded, revocable, and intentionally limited.

Pre-share verification

Done	Verification item
☐	Demo environment indicator is correct.
☐	Founder can enter the prepared league and complete the approved walkthrough.
☐	Viewer can browse but cannot claim a team or use destructive/admin actions.
☐	At least one seeded final game shows players for both teams in the full box score.
☐	League stats include players from seeded completed games.
☐	No debug, Firebase, repository, source-path, credential, or secret information appears on screen.
☐	Private demo link opens on the target device and account.
☐	Deck, demo guide, and backup visual reel open offline.
☐	Access entry is recorded in the private tracker.
☐	Revocation reminder is scheduled for the expiration date.

After the pitch

Close the loop

- Record who attended, what was shown, what was requested, and the agreed next step.
- Send only the approved follow-up material to confirmed recipients.
- Disable or delete viewer access when it expires.
- Rotate any credential that may have been exposed.
- Review demo activity for unexpected access or forwarding.
- Preserve meeting notes and material versions as a private diligence record.

The demo is evidence of product thinking. It is not permission to distribute the app, copy protected systems, or access production infrastructure.
