

FRANCHISE MOBILE

NBA 2K CONNECTED LEAGUE COMPANION

A working concept for making MyNBA and MyGM leagues persistent, social, and manageable between console sessions while NBA 2K remains the authoritative gameplay experience.

THE GAP

Franchise communities coordinate schedules, trades, rules, and conversation through disconnected chats and spreadsheets. Activity slows between console sessions and when teams become vacant.

THE PROPOSAL

Give the same league a persistent mobile home for management and community activity, then return users to NBA 2K for authoritative playable matchups.

PROPOSED CONNECTED LOOP

Proposed for evaluation. No public NBA 2K integration API is assumed.

WORKING PROTOTYPE DEMONSTRATES

- Persistent 30-team leagues and schedules
- GM Lounge, chat, voting, alerts, and moderation
- Trades, commissioner review, and CPU vacancies
- Scouting, player evaluation, and development
- Strategy, results, box scores, and league statistics
- Awards, offseason management, and continuity

STRATEGIC VALUE TO 2K

- Extends MyNBA/MyGM engagement beyond console sessions
- Brings league coordination into the NBA 2K ecosystem
- Helps private and public leagues remain active
- Creates more reasons to return for scheduled games
- Builds toward MyCAREER squads, events, and community

INITIAL REQUEST

A private product and technical evaluation

with NBA 2K product leadership, Visual Concepts MyNBA/MyGM development, and the appropriate 2K online, mobile, or strategic partnerships representatives.

CLEAR PRODUCT BOUNDARY

Franchise Mobile contributes

Mobile league operations, front-office workflows, social coordination, and community continuity

2K remains authoritative for licensed data, accounts, gameplay, anti-cheat, and final results
